Xora Makes it Easy to Deliver Excellent Service

To the builders of construction projects, time is money and completing a job on time and on budget depends on superior planning and scheduling. But while schedules and plans are critical to a project's success, plans and schedules don't build things: people do. With Xora, you can make short work of managing a workforce that spends most of its time on job sites or traveling between them.

However, managing a workforce that works directly with these customers creates many challenges such as tracking payroll, time spent on specific jobs managing fuel and mileage expenses and capturing proof for services provided.

> We save up to $200,000 a year by using Xora to reduce our payroll and mileage related expenses.
>
> *Paula Wiens, Controller, R&J Construction*

Xora Helps Field Service Organizations

Estimate Job Cost and Budgeting
Track how long a worker spends on a specific task or job. Analyze job activity and improve budgeting accuracy to ensure future projects bids are profitable.

Provide Proof of Service
Document when a job is completed with GPS location services. Analyze time and costs per job with automated reports utilizing captured time stamps for customer appointments, billable job activity and job specific details.

Accurately Track and Manage Payroll
Enable workers to record their daily time with their mobile device, eliminating the need for paper-based timesheets and manual data processing. Record time spent at a specific location as well the travel time between locations, reducing payroll and overtime expenses and increasing employee productivity.

Document Employee Safety
Utilize mobile forms allowing workers to document accidents as they happen with their mobile device, ensuring the effective management of workman's compensation claims and expenses.

Reduce Mileage and Fuel Expenses
Reduce fuel expenses by analyzing worker's routes to accurately track and help ensure the appropriate usage of company vehicles. Decrease mileage expenses by enabling workers to accurately record their mileage on their mobile device, which can be validated with GPS locations services.

> Employees are making better decisions and reporting their activities more precisely and accurately. In just the first year of using Xora, our profitability jumped 50% without making any other changes to the business.

Xora Makes it Easy to Stay Focused on Customer Needs
Gain visibility. Reduce costs. Increase productivity.

Xora's Solution

The Xora Mobile App can be easily downloaded to your worker's mobile device. Once activated, the Mobile App turns the device into a productivity tool enabling them to record work hours, access daily assignments and collect information.

Office employees are able to connect with their mobile employees through a web-based Management Application giving them greater visibility and management of activities occurring in the field.

Cloud-Based Management

Mobile App

Back Office Integration

Mobile Employees:
Use handheld devices to send location, time, and job data to in-house staff.

Operations & Dispatch:
Access real-time and historical information to monitor and optimize operations.

Business & Finance:
Exchange or connect to data to automate processes and analyze trends.

Key Features

GPS Location Services

You can see the location of every mobile employee on a Google Map. Drill down by individuals to see where they have been, how long they have been there, the route they have driven and where they are now. Use this information to optimize service routes and reduce fuel expenses.

Mobile Timesheets

Employees can record daily hours and breaks with the Mobile Timesheets application on their mobile device. This information can be pulled from Xora and integrated into your existing Payroll system significantly reducing the costs associated with manual data entry and processing.

Mobile Forms

Employees can enter critical visit information on their mobile device with Xora's configurable Mobile Forms. Typical forms used include visitor surveys and conditions reports and they have the ability to collect signatures and capture photos.

Mobile Jobs

Employees can see their assignments for the day on their mobile device. They can review the details and see the locations with Google Maps. Additionally, they can create their own assignments and receive updates throughout the day.

Real-Time Alerts

Real time alerts can be emailed to administrators keeping them informed of key events occurring in the field. Alerts can be set up for items including visit or delivery confirmation or to notify an administrator if too much time has been spent at a specific location.

Automated Reports

Xora captures a tremendous amount of data, which can be delivered how and when you want enabling you to analyze performance and optimize results. Plus, Xora data can be integrated into your other office systems like CRM and payroll.

Xora can be up and running in days not months, with no hardware investments, for under $1 per day per user.
