

Xora Makes it Easy to Deliver Excellent Service

The transportation and distribution industry is essential to supplying goods and services to our ever growing population, whether it's cross country or to local businesses. In this industry, it's important to deliver on time and to be able to accommodate last minute customer requests.

However, managing mobile employees that work directly with these customers creates many challenges such as planning the best routes for maximum efficiency, tracking payroll and fuel expenses and capturing proof of services provided.

Xora has helped differentiate our service in a tough economy and has been central to improving customer satisfaction, resolving disputes and tracking our high-value shipments. It's a utility that we can't turn off.

Gene Hartmann, Vice President, Ohio Eastern Express

Xora Helps Transportation and Distribution Companies

Have Visibility

Make more informed decisions about how to direct your team by knowing where your drivers have been, where they are at any time, and what they're doing. Guide them to be more productive and help ensure their safety when they are on the road.

Provide Proof of Service

Document when a job is completed with GPS location services. Capture GPS location and time stamps for customer deliveries and collect delivery site photos and customer signatures for billing and reimbursement purposes.

Reduce Mileage and Fuel Expenses

Reduce fuel expenses and streamline delivery routes by analyzing driving behavior, routes taken, time spent and miles driven. Reduce mileage expenses by enabling employees to record accurate mileage on their mobile device which can be verified by the Xora GPS locations services.

Accurately Track and Manage Payroll

Enable drivers to record their daily time with their mobile device, eliminating the need for paper-based timesheets and manual data processing. Use GPS stamped timesheets to document time spent at a specific location as well the travel time between locations, reducing payroll and overtime expenses and increasing employee productivity.

Automate Job Dispatch and Management

Know exactly where an employee is at any given time, allowing dispatchers to easily direct and locate drivers, schedule their day and quickly accommodate customer requests by sending job details and instructions to the employee's mobile device.

Field employees can update the status of their jobs, collect customer and competitive information and have that information instantly available for the office using their mobile device.

Xora is projected to save the company nearly \$1 million in annual costs by reducing merchandising and driver hours.

Major US Bottler

Xora Makes it Easy to Stay Focused on Customer Needs

Gain visibility. Reduce costs. Increase productivity.

Xora's Solution

The Xora Mobile App can be easily downloaded to your driver's mobile device. Once activated, the Mobile App turns the device into a productivity tool enabling them to record work hours, access daily assignments and collect information.

Office employees are able to connect with their mobile employees through a web-based Management Application giving them greater visibility and management of activities occurring in the field.

Key Features

GPS Location Services

You can see the location of every mobile employee on a Google Map. Drill down to see where drivers have been, how long they have been there, the route they have driven and where they are now. Use this information to optimize delivery routes and reduce fuel expenses.

Mobile Timesheets

Employees can record daily hours and breaks using Mobile Timesheets on their mobile device. This information can be pulled from Xora and integrated into your existing Payroll system significantly reducing the costs associated with manual data entry and processing.

Mobile Forms

Employees can enter critical delivery information on their mobile device with Xora's configurable Mobile Forms. Typical forms use expense and mileage reporting as well as vehicle inspections and customer surveys. Plus, employees have the ability to collect customer signatures and capture delivery photos.

Mobile Jobs

Employees can see their assignments for the day on their mobile device. They can review the details and see the locations with Google Maps. Additionally, they can create their own assignments and receive updates throughout the day.

Real-Time Alerts

Real time alerts can be emailed to administrators keeping them informed of key events occurring in the field. Alerts can be set up for items including delivery confirmation or to notify an administrator if too much time has been spent at a specific location.

Automated Reports

Xora captures a tremendous amount of data, which can be delivered how and when you want enabling you to analyze performance and optimize results. Plus, Xora data can be integrated into your other office systems like CRM and payroll.

Xora can be up and running in days not months, with no hardware investments, for under \$1 per day per user.
